

PPP POULTRY PROCESSING EQUIPMENT

Manufacturing and supplying poultry equipment since 1962

Plucker

Scalder

Killing cone funnel

How does the PPP small processing plant operate:

Birds are placed in the killing cone funnels with head down – the birds throat is cut

Once the bird has bled out it is then placed in the scalding

The bird is removed from the scalding and placed in the plucker

The plucker can process about 2- 3 birds per minute depending on size
