

PPP's new and improved Dairy Feed Dispenser

- + Fits model 75mm & 90mm Auger Lines
- + Clear & Durable Dispenser made of UV stable polypropylene
- + Is resistant to damage from sunlight, cold temperatures and corrosive environments.

Large inlet hole
(60mmx50mm)

This allows for easier flow of PKE into the dispenser as well as large nuts

Pulley for Drop Ball

Built-in pulley system minimizes cable cutting into dispenser

Clear UV resistant Body

Provides quick visual confirmation that feed has been dispensed.

Easy Adjustable Dosage Tab (500g – 4kg)

Side mount dosage tab ensures cows do not interfere with settings

65° Angle Single Base Cone

Improves flowability of difficult mixes such as PKE

Large Outlet (77mm)

Improves product flow and reduces bridging issues meaning you can use 100% Palm Kernel.

Tear Drop Shaped Drop Ball

Seals off the bottom of the dispenser at any angle it falls at because of the round base and the pointed top pulls up through feed easily

Stainless-steel Drop Tubes

This gives a strong, clean, rust resistant finish
